Understanding Online Customer Shopping Behavior

Month ▾

VisitorType ▾

Total Sessions
12,330

Total Purchases
1.9K

Purchase Percentage
15.47%

Average Session Duration
08:51

Dashboard Intention

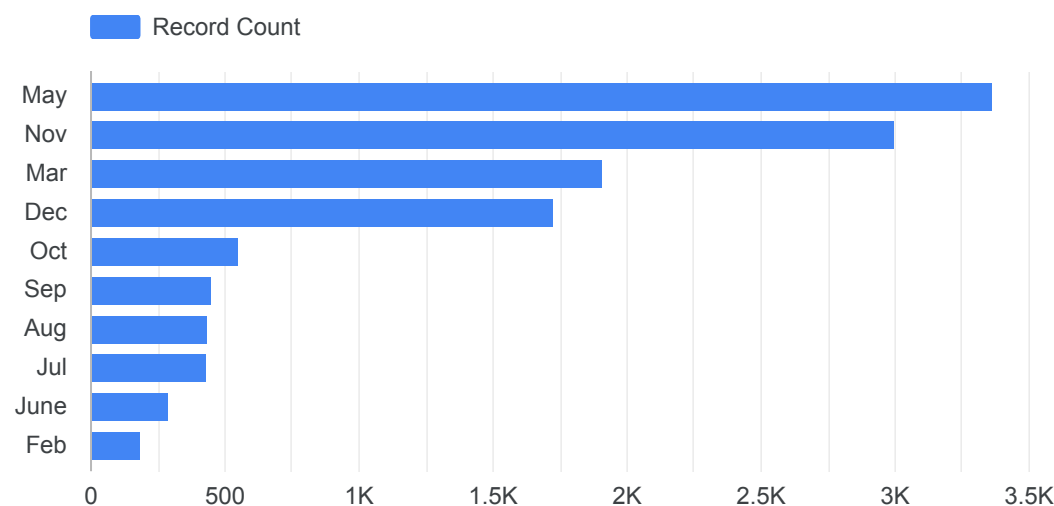

The purpose of this dashboard is to illustrate the online customer shopping behavior and the factors what influence online shopping intention

Key Insights

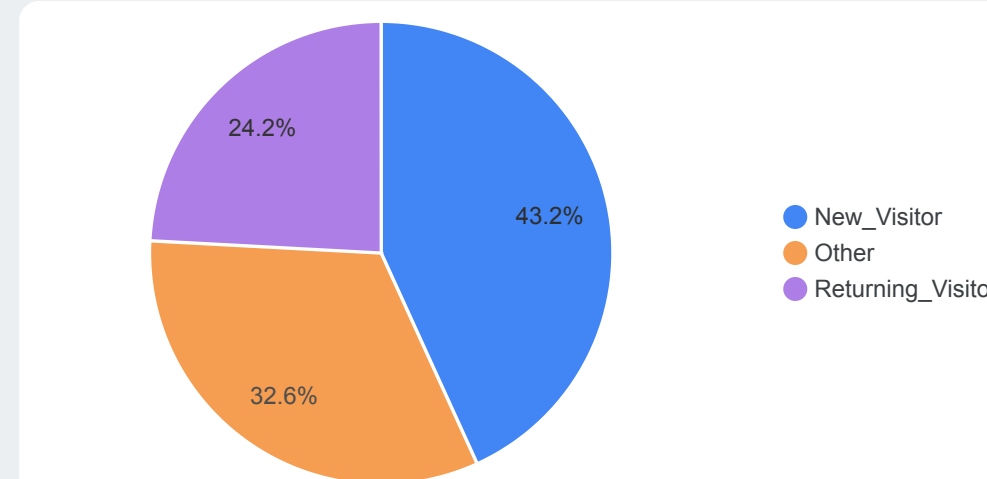

1. Most sessions do not result in a purchase
2. New visitors have a higher conversion rate than returning visitors
3. Product-related browsing can be associated with purchases
4. The majority of purchases occur during weekday
5. Only 15.47% of sessions resulted in purchases

Business Recommendations

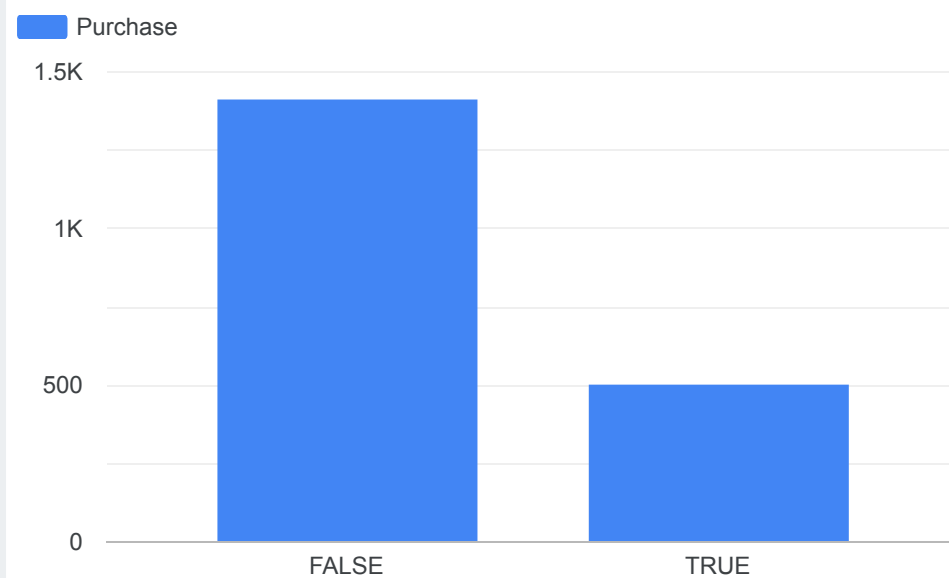

The business should focus on improving visitor conversion by encouraging deeper product exploration, reducing unnecessary exits from important pages, and monitoring conversion rates across visitor groups and periods of varying traffic. These actions could help the business turn more browsing sessions into purchases while using customer behaviour data to guide website improvements.
